

Submit an event

Share a club event, a CTSG event, or an opportunity for Cornell Tech students. CTSG reviews submissions before they appear on the calendar.

One form in Notion. Six main questions. * Required.

1 Event title *

What is the event called?

2 Organizer / club *

Name the club, CTSG, student organizer, or external host.

3 Date and time *

Start and end date/time, or all-day. Use New York time.

4 Location *

Campus room, venue and street address, or online.

5 Short description *

What is it, and who can attend? Up to 100 words.

6 Event / registration link

Required for external opportunities; optional for other events.

Optional: event image. An image is not required to submit.

Review stays in Notion

Every submission enters the same database as **Pending**. CTSG assigns the calendar category and changes the status to **Approved** before publication. These are internal fields, not form questions.

Club events follow the normal approval process using the same record; external suggestions, such as an NYC hackathon, are reviewed before listing.

Based on the existing CTSG Events Form. Retains its core questions, adds location and an event link, broadens the organizer field, and makes the image optional.
